

AI based Natural Disaster Analysis

China, India and the United States are among the countries of the world most affected by natural disasters. Natural disasters have the potential to wreck and even end the lives of those people, who stand in their way. However, whether or not you are likely to be affected by a natural disaster greatly depends on where in the world you live, The objective of the project is to human build a web application to detect the type of disaster. The input. is taken from the in built web cam, which in turn is given to the pre trained model. The model predicts the type of disaster and displayed on UI.

Earthquake

cyclone

Flood

wildfire
